

# TOP SECRET FOR YOUR EYES ONLY MISSION INCOMING

MISSION 1.4:

## <Fingers Off>

secretcode<agent> 00000 1 00000 19299292 <INCOMINGMISSION>

0000000 <NOPARENTSALLOWED>

CODE NAME

NSN (NOT-A-SPY-NUMBER)

**<Q> What is the #1 problem that CIA agents have to deal with?**

**<A> Security. Trespassers are always trying to break into our systems.**

</Mission Briefing>

The Children's Intelligence Agency has a security situation.

Pesky intruders are trying to guess our password to break into our intelligence systems.

We urgently need to ramp up the Children's Intelligence Agency security system.

## </Mission Instructions>

### Step 1: Design Your Password

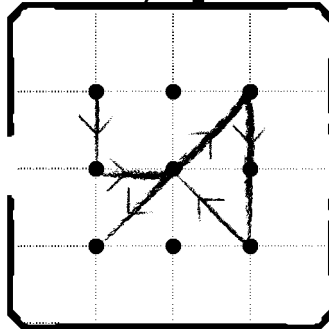

A password tells a computer that you are who you say you are. It's a **word** that lets you **enter a secure zone**. Our new security system uses special shapes instead of words. Connect the dots to draw a shape that only YOU will know.

Make sure it's something you won't forget, and no one would guess. If you only connect a few dots, the passcode will be easy to crack. If you connect too many, you might forget it yourself!

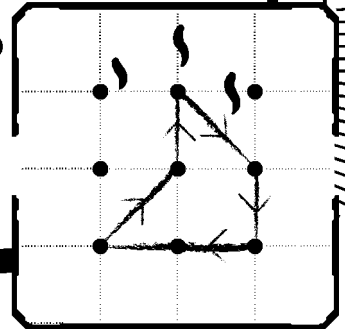

This is a bad password:

This is a good password:

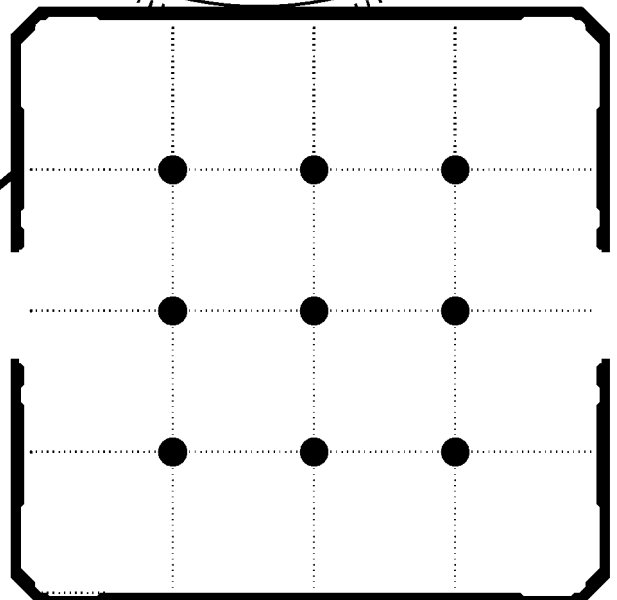

This is a pointy poop:

Use this blank grid to design your passcode.

- <1>** Connect the dots to create a shape.
- <2>** Keep your pen connected to the paper and start drawing.
- <3>** When your shape is finished, lift your pen.

Think your passcode will keep out the toughest trespassers? High-five your closest agent.

## Step 2: Keep out!

You get three tries to enter the correct password before you are locked out. What happens if an intruder tries to break in? Write a message for anyone who tries to sneak past the CIA security system by filling in the blanks below.

0000011101000

000000000

<INTRUDER ALERT>

000000000000

<WARNING>

### INTRUDER ALERT

We have an intruder, activate lockdown!  
Write a message here:

### ACCESS GRANTED

Hurrah! You've entered the correct password.  
Write your welcome message here:

Congratulations! You've created a **Loop** that checks if a passcode is true or false.

## Step 3: Intruder Alert!

Program your computer to send you an alert when someone tries to break into the system. Agents need to be alerted when security is compromised. Think about how you want to be alerted. Would it be an email? A phone call? A blinking red light? Describe your intruder alert system below:

## Step 4: The Ultimate Test

Do you remember your passcode from step 1? Draw your passcode from memory in the blank grid to the right. No peeking!

</Mission Complete>

If you've completed this on a computer, go to [ciakids.org/missions](http://ciakids.org/missions) where you can upload this file.

Else email us a photo of your completed worksheet to [mission@ciakids.org](mailto:mission@ciakids.org).

Else send your completed mission by post to the CIA HQ at 20 East Road, London, N1 6AD.

get your Agent Logbook at [www.ciakids.org](http://www.ciakids.org) and stick your Mission Badge in.

**</Mission Badge>**

Cut out your new badge and stick into your Agent Logbook.

**</key Clue>**

Crack this clue to reveal the secret key to unlock level 2.

**Key #1.4: What is the third letter of every CIA agent's biggest problem?**
