

## FINANCE REPORT FOR ET DISCUSSION

# October 2015

---

## FINANCIAL OVERVIEW & KEY RISK AREAS

### DP Income

Year to date actual income is £10.44M which remains within 1% of budget year to date. Given that we are so close to forecasted budget the full year forecast of £18M is deemed appropriate to remain as the full year forecast. The annual peak expected in October was less than expected, however it does not take us below our budget tolerance and is therefore not considered to be of risk.

### Cash Underspend

We continue to forecast an underspend against our budgeted income of just less than £700k.

We will continue to monitor our resources by:

- Review of income forecasts each month for accuracy/ prudence
- Fee income strategic work around how we set our fee levels
- Isolate key spend areas or projects that could be accelerated or put on hold for a quick turnaround if our environment changed with little notice
- Regular balance sheet reporting and cash flow forecasts were originally expected to be in place by the end of the financial year, however changes in our sponsor department and departmental changes have reduced the priority status of these reports in favour of development of reporting methods to DCMS in preparation for year end. This activity will be re-scheduled for the following year.

### Staff Recruitment

Staff costs pose a significant risk to the business if recruitment cannot keep up with budgeted staff levels.

Although we are showing a significant underspend under staff, recruitment in October is sufficient to mitigate any risk of underspend and pull the actuals into line with budget by the end of November. The situation is being monitored and re-forecasted where appropriate monthly, if and where staffing situations or business needs change.

Due to the decision by HM Treasury that specific approval should have been sought for the Deputy Commissioner salary increases, an administrative fine of £18,400 has been imposed and will be recognised within this financial year. Retrospective approval was given and a briefing note included in the 2014/15 annual report.

### Capital Spend

Our 'allocated' capital budget has now been informally confirmed as £850k (formal approval to follow at Budget Version 2). Planning has

begun with DCMS on a capital programme mapping out our capital plans for the next four years.

## **Budget Version 2**

We are now reporting internally against Budget Version 2 (BV2), reporting to the MOJ continues to be against BV1 until formal approval has been given. This is now unlikely to be given and rather budget discussions moved directly to DCMS.

## **Movement of sponsorship from the MOJ to DCMS**

Some reports have now moved to DCMS with full reporting planned to move across in the New Year. New budget discussions for 2016/17 are solely being held with DCMS. This may change how we shape and report our new budget. The year end process with DCMS is likely to be considerably different to that with the MOJ, a process is being mapped and the appropriate staff briefed over the coming months.

## **Purchase Management System**

Purchase Management System is now live which represents a significant step forward in the financial control at the ICO. There have been various challenges due to some project management and staff changes throughout the project and we have experienced a number of teething problems, however overall the system has been well received by staff and when fully bedded in will show significant improvements in the financial reporting, efficiency and control company wide.

## **INCOME**

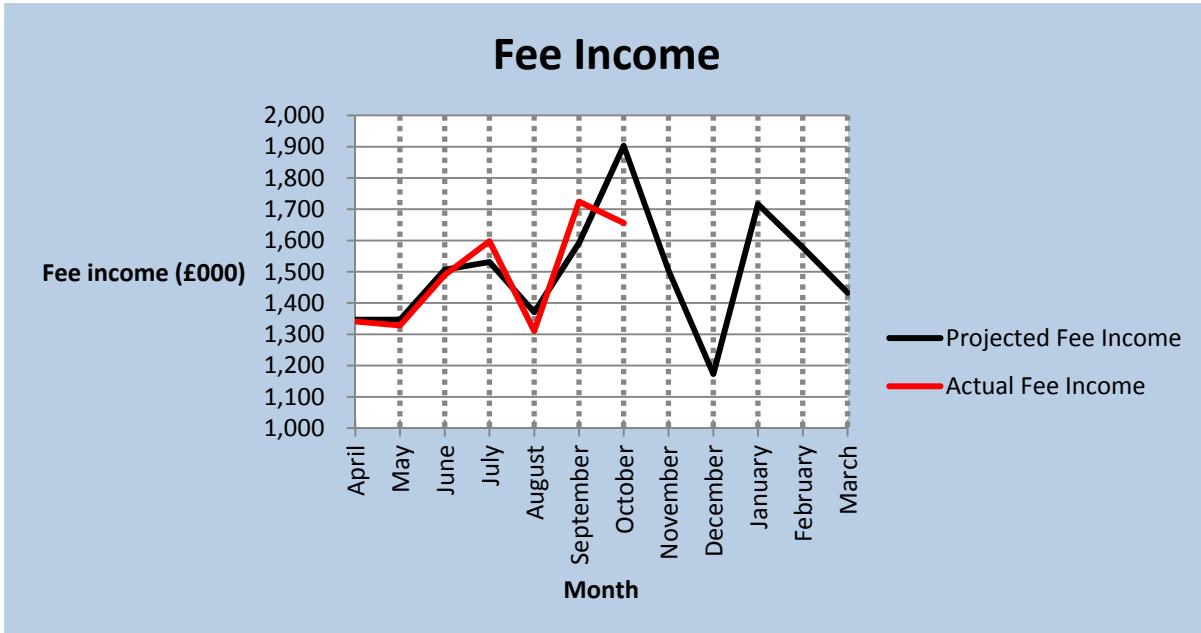

### **Grant-in-aid for freedom of information activities**

The grant-in-aid available for drawdown over 2015-16 has been confirmed at £3.7M, the first three tranches of £938k, £921k and £921k respectively have been drawn, a further drawdown is expected in January of £921k. In future, DCMS have expressed a preference to move to monthly drawdowns. This will be phased in over the coming months.

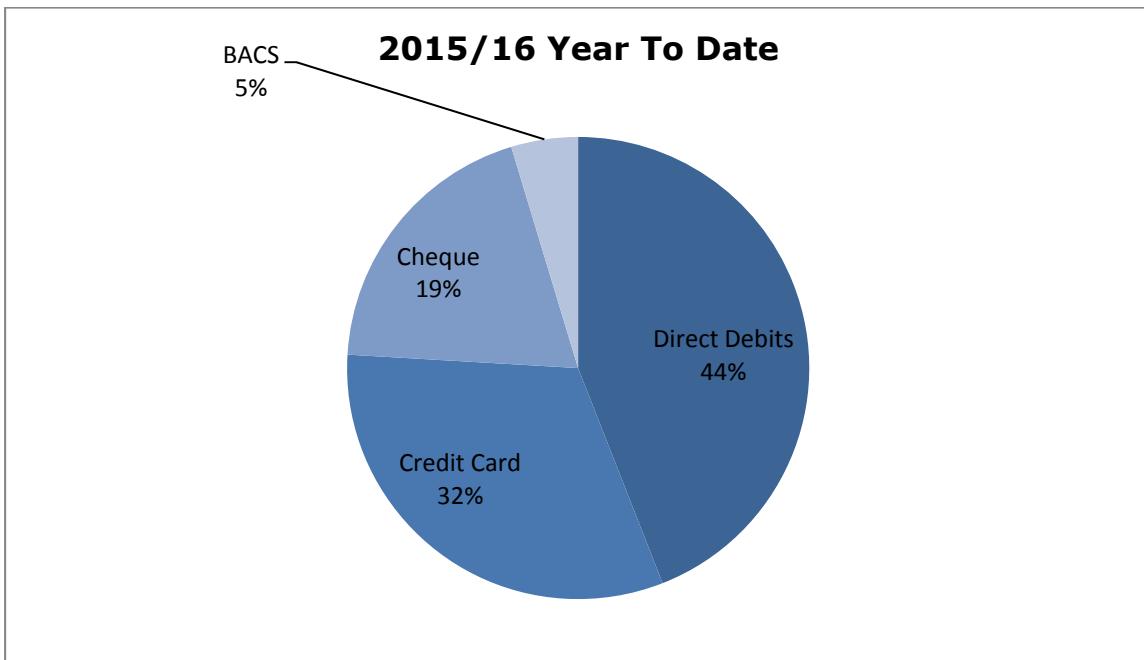

### **Data Protection fees processed**

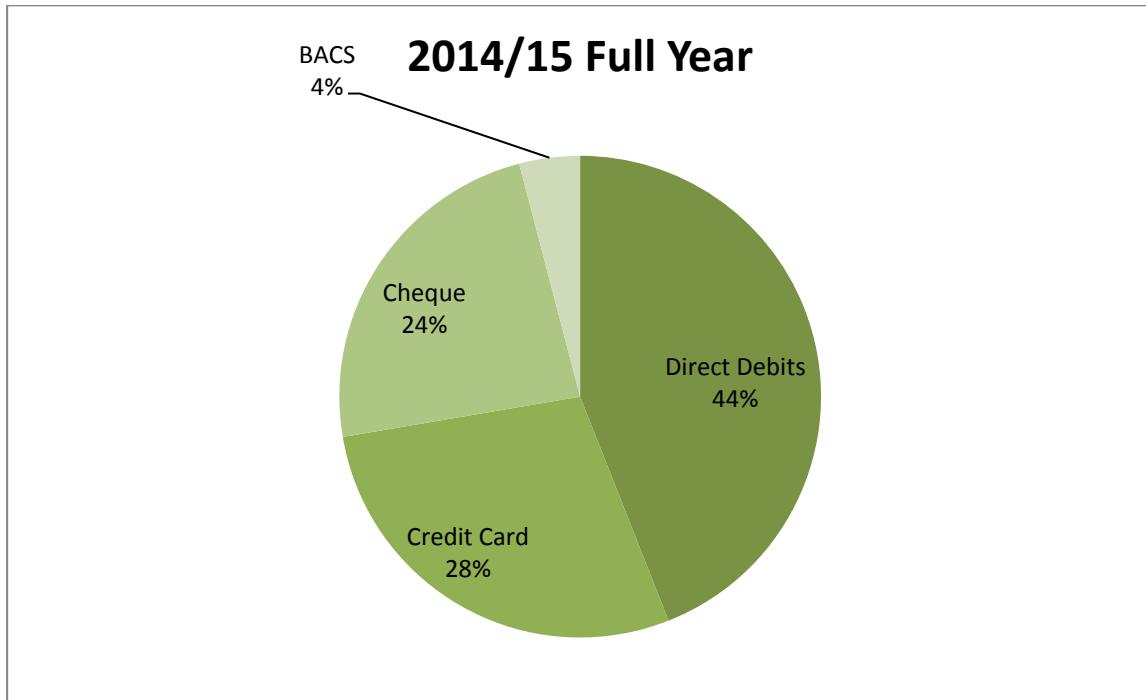

The chart below shows the actuals vs our current budget for the year 2015/16.

October income is £247k short of the expected levels, however any overall effect of this was counteracted by an over-recovery in September, leaving us in a healthy position of within 1% of forecasted budget. There is no specific reason why there has been an under recovery of fees in October, it is likely to be a combination of factors such as late registering, cancelled registrations or less new registrations than expected. This will be monitored carefully in November to ensure that the under recovery is not a pattern.

The year to date fee payment method split is shown below, showing a definite trend towards credit card payments ( $\uparrow 4\%$ ) and away from cheques ( $\downarrow 5\%$ ) from the average over 2014/15. Direct Debits remain consistent and BACS payments are up ( $\uparrow 1\%$ ).

## EXPENDITURE

### Spending controls

The ICO is complying with the Cabinet Office Spending Controls Guidance v 4.0

<https://www.gov.uk/government/publications/cabinet-office-controls/cabinet-office-controls-guidance-version-40>

We are also required to obtain specific approval from our sponsor department DCMS for any IT or communications spend over £50k for individual projects. We will only be required to report spend over £50k not included in the original budget. We are currently seeking approval for the replacement SAN following the IT system outage, estimated at £140k.

### Total office costs

There are quite a few categories within office costs that are over or under budget, as this is the first year we have separated out all of the distinct categories, the budget needs further work to make sure that each category is sufficiently resourced, this work will be engaged before the year end. Overall the budget is within 7% and not considered to be a risk of material over or underspend. This is being monitored closely.

### Total staff FTE report and costs

Staff costs have come in £262k (3%) below forecasts for October.

As reported in September, we expect to be over compliment by November (currently 17.6 under compliment, reduced from 26 in the previous

month) which will start to show a gradual decrease in the underspend towards the end of the financial year.

### **Training and Recruitment**

Recruitment is over budget by £27k, largely due to the costs of recruitment of a new deputy commissioner (c. £10k) and other large scale recruitment drives to keep staff expenditure on track. There are some minor over and underspends amongst training due to the additional training of new starters. The overall spend of 36% is not to be considered a risk as it is a direct consequence of our strategic response to the underspend within staff costs.

### **IT Costs – Service Delivery**

IT spend overall is to budget (within 9%), there are some fluctuations against budget lines where the spend is determined by usage – software licensing, printing usage and telephony, which is to be expected. The overall budget is being managed closely and will be reviewed as additional resource may be required if the budget continues to rise outside the 10% tolerance.

Considering the major business impact of the IT incident in May, the actual realised costs (outside resource downtime) have been kept to a minimum and have been estimated at less than £15k. This additional cost has been included within App & Desktop Support.

### **IT Projects**

There is an underspend within IT projects of £230k (40%). This budget tends to be back end loaded due to the time it takes to mobilise projects after budget approval, however it is expected to spend to budget.

### **Communications Spend**

Due to the almost seasonal nature of the communications spend especially within Campaigns, Print & Conferences we expect to see a deviation to the profiled budget. This will continue to improve as the months move on and we can profile more accurately. After review, no particular risk area has been identified with the communications spend, currently underspent by 16%.

### **Banking, finance & audit costs**

Finance costs are as expected. Savings are expected to be made within bank charges due to more payments being made as BACS rather than cheques.

## **Staff travel**

Overall staff travel is underspent by 13% of budget, potentially due to the decrease of executive travel in the run up to both deputy commissioners leaving in October and November. Travel is expected to be on budget overall.

## **Legal, professional & other**

Legal & other costs are underspending by £82k, the majority of which is due to a £36k underspend on legal, £16k underspend on privacy seals and £12k on research. Legal and research budgets fluctuate based on caseload, but consistently spend to budget overall. The privacy seals project has only been commissioned late in the year and is also expected to spend to budget.

## **CAPITAL EXPENDITURE**

Across the IT project expenditure, approximately £300k is capital in nature. This will be confirmed during a detailed capital review later in the year.

## **Civil Monetary Penalties**

The current debtor of CMPs owed to the ICO as at 31 October 2015 is £681,790.

B/f 2014-15	142,500
Issued penalties gross	996,000
Issued penalty increase post appeal	-
Issued prompt payment discount	(68,000)
