Freedom of Information Act 2000

Definition document for community health councils in Wales

This guidance is written for the use of community health councils (CHCs) in Wales. It gives examples of the kinds of information that the ICO expects you to provide in order to meet your commitments under the model publication scheme.

The ICO would expect you to make the information in this definition document available unless:

- you do not hold the information;
- the information is exempt under one of the Freedom of Information Act (FOIA) exemptions or Environmental Information Regulations 2004 (EIR) exceptions, or its release is prohibited under another statute (eg UK GDPR);
- the information is readily and publicly available from an external website; such information may have been provided either by you or on your behalf. You must provide a direct link to that information;
- the information is archived, out of date or otherwise inaccessible;
- or,
- it would be impractical or resource-intensive to prepare the material for routine release.

If the information is held by another public authority, you should provide details of where to obtain it.

This guidance is not meant to give an exhaustive list of everything that should be covered by a publication scheme. The legal commitment is to the model publication scheme, and you should look to provide as much information as possible on a routine basis.

As a minimum, the ICO expects you to make available information that is required by statute or by the Welsh Government.
Publishing datasets for re-use

As a public authority, you must publish under your publication scheme any dataset you hold that has been requested, together with any updated versions, unless you are satisfied that it is not appropriate to do so. So far as reasonably practicable, you must publish it in an electronic form that is capable of re-use.

If the dataset or any part of it is a relevant copyright work and you are the only owner, you must make it available for re-use under the terms of a specified licence. Datasets in which the Crown owns the copyright or the database rights are not relevant copyright works. The 2018 section 45 Code of Practice recommends that public authorities make datasets available for re-use under the Open Government Licence.

The term “dataset” is defined in section 11(5) of FOIA. The terms “relevant copyright work” and “specified licence” are defined in section 19(8) of FOIA. The ICO has published guidance on Datasets (sections 11, 19 and 45). This explains what is meant by “not appropriate” and “capable of re-use”.
