Freedom of Information Act 2000

Definition document for Police Authorities and the Northern Ireland Policing Board

This guidance is written for Police Authorities and the Northern Ireland Policing Board. It gives examples of the kinds of information that the ICO expects you to provide in order to meet your commitments under the model publication scheme.

The ICO expects you to make this information in this definition document available unless:

- you do not hold the information;
- the information is exempt under one of the Freedom of Information Act 2000 (FOIA) exemptions or Environmental Information Regulations 2004 (EIR) exceptions, or its release is prohibited under another statute (eg UK General Data Protection Regulation);
- the information is readily and publicly available from an external website. Such information may have been provided either by you or on your behalf. You must provide a direct link to that information;
- the information is archived, out of date or otherwise inaccessible; or,
- it would be impractical or resource-intensive to prepare the material for routine release.

If the information is held by another public authority, you should provide details of where to obtain it.

This guidance is not meant to give an exhaustive or definitive list of everything that should be covered by a publication scheme. The legal commitment is to the model publication scheme, and you should look to provide as much information as possible on a routine basis, which must include all information that is required by statute.
Publishing datasets for re-use

As a public authority, you must publish under your publication scheme any dataset you hold that has been requested, together with any updated versions, unless you are satisfied that it is not appropriate to do so. So far as reasonably practicable, you must publish it in an electronic form that is capable of re-use.

If the dataset or any part of it is a relevant copyright work and you are the only owner, you must make it available for re-use under the terms of a specified licence. Datasets in which the Crown owns the copyright or the database rights are not relevant copyright works.

The 2018 Section 45 Code of Practice recommends that public authorities make datasets available for re-use under the Open Government Licence.

The term “dataset” is defined in section 11(5) of FOIA. The terms “relevant copyright work” and “specified licence” are defined in section 19(8) of FOIA. The ICO has published guidance on Datasets (sections 11, 19 and 45). This explains what is meant by “not appropriate” and “capable of re-use”.

The table below identifies the specific information the ICO expects you to publish under each of the seven classes of information set out in the model publication scheme.

You cannot charge a re-use fee if you make the datasets available for re-use under the Open Government Licence.

**Class 6 - Lists and registers**

Information contained only in currently maintained lists and registers

- **Public registers and registers held as public records**
  If you are required to maintain any register and make the information in it available for public inspection, the existing provisions covering access will usually be adequate. However, publicise which public registers you hold, and how you make the information in them available to the public. Where registers contain personal information, ensure that you consider the data protection principles.
• **Asset registers and information asset register**

You do not need to publish all details from all asset registers. However, do publish the location of public land and building assets and key attribute information that is normally recorded on an asset register along with some other information from capital asset registers. If you have prepared an information asset register for the Re-use of Public Sector Information Regulations 2015, publish the contents.
